

Lost Subject Behaviour: Alzheimer

Normally grouped with other specialist training, these modules cover knowledge and skills related to the theory and practice of specific Lost Subject Behaviours. They provide much more detail on the specific subject categories than can be provided in more general courses. Application of training to search and rescue is provided through scenarios and practical exercises.

Duration:

Modules may be delivered separately but are normally grouped with components from other courses to suit participant's needs. Duration will therefore vary. Pre-course work will often be available on line. Assessment occurs alongside the training.

Eligible for NZLSAR subsidy

Recommended for: all search and rescue personnel.

Prerequisites: There are no prerequisites for this course although involvement in the search and rescue sector is an advantage.

Venue recommendations: classroom type settings, OHP etc

Course Numbers: minimum 12 and maximum 20

Four modules are available, normally in combination with others:

Module	Reference Code	Level	Credits
Prevent wandering of Alzheimer Patients	SAR 3 – 96	3	1
Analyse management of Alzheimer searches	SAR 3 – 97	3	2
Detection of missing Alzheimer patients	SAR 3 – 98	3	2
Interpret lost subject behaviour theory and research and apply this to search practice	SAR 3 – 119	5	6

Lost Subject Behaviour: Suicides

Normally grouped with other specialist training, these modules cover knowledge and skills related to the theory and practice of specific Lost Subject Behaviours. They provide much more detail on the specific subject categories than can be provided in more general courses. Application of training to search and rescue is provided through scenarios and practical exercises.

Duration:

Modules may be delivered separately but are normally grouped with components from other courses to suit participant's needs and so the duration will vary. Pre-course work will often be available on line and assessment will occur alongside the training.

Recommended for: all search and rescue personnel.

Venue recommendations: Classroom type facilities

Prerequisites: Successful completion of the Search Methods course is required and involvement in the search and rescue sector is advantageous.

Course Numbers: minimum 12 and maximum 20

Two modules are available, normally in combination with others:

Module	Reference Code	Level	Credits
Interpret suicide theory and research data and apply this to searching for suspected suicides	SAR 3 – 117	5	6
Search for suicides in Search and Rescue operations	SAR 3 – 118	5	9
